a Mannaberg activities in the original report

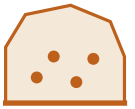

A1462 · Probable cultivation horizon

Ash charcoal · 3449 ± 30 BP
1880–1680 BCE (reported)
Cereal grain is undated

Schematic

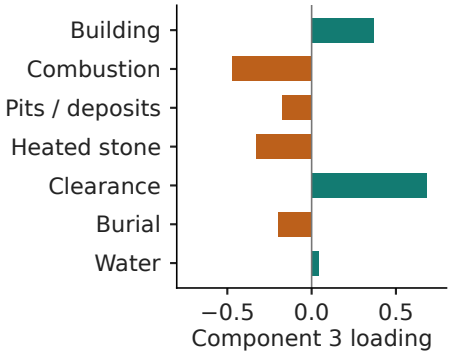

A645 · Cereal-rich cooking oven

Oak charcoal · 3667 ± 44 BP
2200–1920 BCE (reported)
Later pottery; repeated use

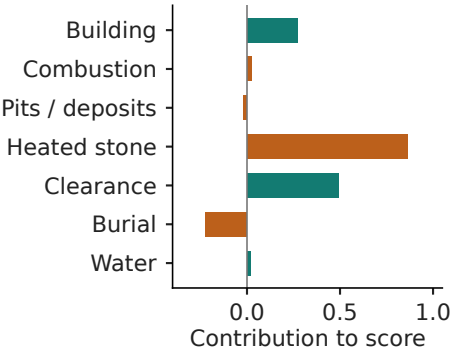

Schematic

b Frozen landscape balance

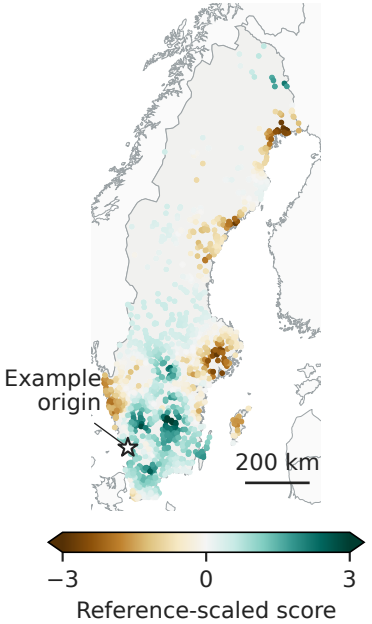

c Contributions at the example origin

Example score = 1.425

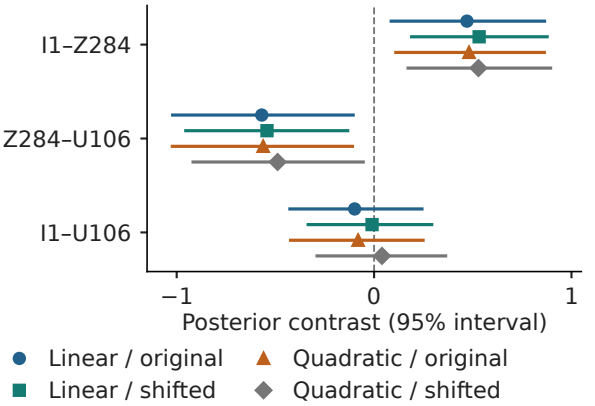

Low relative proximity to heated stone raises the example score.

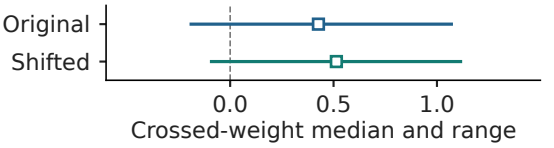

d Late Neolithic landscape

e National lineage contrasts

f I1–Z284 dependence sensitivity

Contexts explain feature families; the regional score combines all seven. Nordin (2023), pp. 19–20, 67, 97, 100.
