a Ancient locations and later activity landscapes

Viking AD 750–1050 · Medieval AD 1050–1520. One ancient map shows the union of both windows.
The two profile maps have distinct archaeological meanings and reference units.

b Branch contrasts and dependence sensitivity

Filled circles: posterior means and 95% intervals. Open squares: crossed-weight medians and ranges.
Estimates use the original branch representation; coarser-cut sensitivities are reported separately.

c Original contexts define both poles

Viking activity balance
Positive: charcoal production · Färila
Positive: iron-working waste · Harbo-Smedsbo
Negative: hearth · Fyrislund A6868
Relative to recorded posthole/hearth settings.

Medieval activity balance
Positive: brick kiln · Uppsala A817
Negative: tar production · Leksand
Negative: charcoal production · Nifsarp
Production occurs on both poles.

Ancient markers: blue I1; orange square U106; gold triangle P312; magenta diamond Z284; grey unresolved.
All plotted medieval U106, P312 and Z284 people also overlap the Viking window.
Open: contextual date; ×: source quality, exclusion or date qualification.
